COMPANY OVERVIEW

Agri Drip Africa. is a leading provider of sustainable solutions in climate-smart agriculture, renewable energy, and waste management. Our mission is to enhance environmental resilience, improve food security, and promote clean energy through innovative and eco-friendly technologies. We are committed to driving the transition towards a greener and more sustainable future by integrating smart agricultural practices, renewable energy solutions, and circular economy principles.

OUR MISSION

To empower communities, businesses, and governments with innovative, climate-smart technologies that promote food security, energy efficiency, and waste reduction.

OUR VISION

To be a global leader in sustainable agriculture, clean energy, and waste management by providing cutting-edge, eco-friendly solutions that drive economic growth and environmental conservation.

Why choose Agri Drip Africa.?

Innovative & Sustainable Solutions

We leverage modern technology to provide eco-friendly and effective solutions.

Expert Team

Our team consists of agronomists, engineers, environmentalists, and energy experts.

Impact-Driven Approach

We are committed to enhancing food security, promoting clean energy, and reducing waste.

Community Empowerment

We work closely with farmers, businesses, and policy makers to create lasting positive change.

CORE BUSINESS AREAS

Climate Smart Agriculture

We develop and implement sustainable farming practices that enhance productivity while reducing the environmental footprint.

Precision Agriculture

Use of AI, IoT and data analytics for optimized crop production.

Agroforestry Solutions

Integrating trees and crops to improve soil health and biodiversity.

Water Conservation

Smart irrigation systems and rainwater harvesting for efficient water use.

Soil Regeneration

Organic fertilizers, composting, and regenerative farming techniques.

Renewable Energy Solutions

We provide clean and sustainable energy solutions that reduce dependence on fossil fuels. Our expertise includes:

Solar Energy

Installation of solar panels for farms, businesses, and rural electrification.

Biogas Systems

Converting organic waste into clean energy for cooking and electricity.

Wind and Hydro Energy

Small-scale wind and hydro projects to power agricultural activities.

Energy Efficiency Consulting

Helping industries and businesses optimize energy use.

Waste Management & Circular Economy

We promote sustainable waste management practices through innovative recycling and resource recovery solutions.

Organic Waste Recycling

Transforming agricultural and food waste into compost and biogas.

Plastic & E-Waste Recycling

Advanced techniques for re-purposing non-biodegradable waste.

Waste-to-Energy Projects

Converting municipal and industrial waste into renewable energy.

Community Clean-Up Initiatives

Partnering with local organizations to promote environmental conservation.

Cone Garden Farming

Biodigester covered with greenhouse

Animal Waste Fed into Biodigester

Drip Irrigation

Biodigester

Biogas Flame

BISHOP LUIGI LOCATI CHILDRENS HOME

Agri Drip successfully delivered and installed eight (8) kitchen gardens and a shadenet to Bishop Opera Luigi Locati Children's Home. The project objective was to subsidize the orphanage feeding program and to serve as an alternative source of income from sale of surplus vegetables.

IDEAL AFRICA INITIATIVE - WEZESHA PROGRAM

In conjunction with our partner, Ideal Africa Initiative NGO, we undertook the process of installing kitchen gardens in a number of schools in Kajiado County in a project dubbed WEZESHA. The program is currently ongoing with more schools benefitting.

REWA HOMES

With the support of REWA foundation, Agri Drip established thirty (30) verticals gardens and trained thirty (30) women from diverse marginalized communities of Turkana, Maasai, Samburu and Pokot on vertical garden installation, seedling nursery preparation and management.

UJIMBE FARM LIMITED

A social enterprise that promotes sustainable agriculture and green enterprises in Apiculture, and horticulture.
